

Android/iPhone Basics: How to browse, search, borrow, and download titles.

You can browse on the Home Page; but you have more control over searches by selecting "Explore".

From the Explore page, you will have several categories and genres to choose from. For a specific author or title search, tap the magnifying glass and type out your search.

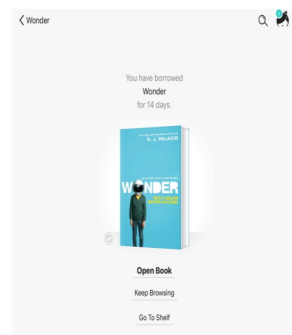

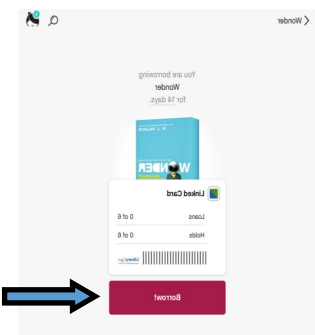

You can select a title by tapping on the book cover. This brings you to the 2nd screen on the left, where you can Tap the Borrow button.

You can borrow 6 titles at one time. By default, ebooks & audiobooks are set to borrow for 14 days.

To return a title early, Tap the word "Shelf". Then tap "Manage Loan". Next, tap the tab that says, "Return Early." Finally tap the "Return" button.

You can change the Download Settings by tapping the Libby icon at the top right corner. By default, unless changed, Libby automatically downloads a title to your device over WI-FI only.

Once you have borrowed a title, tap the book cover to start enjoying the title.

Tapping the screen once will bring a drop down menu. The first icon on the left will change your page view. The second (Magnifying glass) will allow you to search specific words. The third icon will create a bookmark to save you place in the book. The fourth icon (Three Bars) is an options menu, which includes a chapter selection option.
