

Android/iPhone Basics: How to browse, search, borrow, and return titles.

Browse & Search

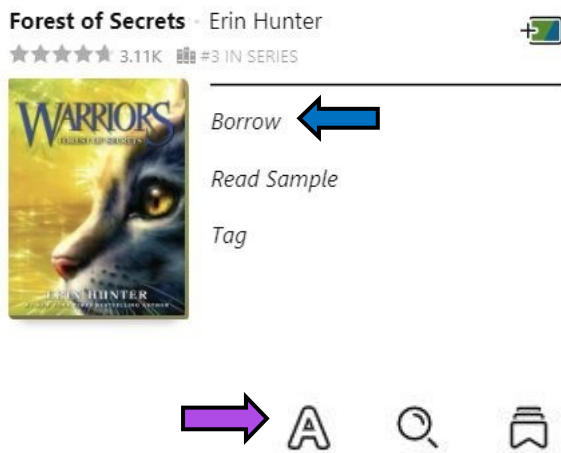

You can browse on the Home Page by simply selecting a **category** from the home screen to browse.

You can also **search the collection** from the home page, by tapping the magnifying glass and entering the title or author, into the search field.

Tip: Set preferences to apply specific filters to search results.

Borrow & Reading Settings

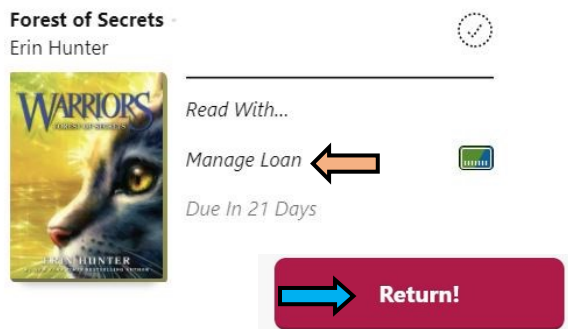

Once you have found the title you want, tap **borrow** to checkout. If the title is not available, tap place hold instead and you will be put on the hold list.

The title will automatically download to your device. Open the book to read.

You can change font, size, and display type by tapping the **reading settings** button.

Return

To return a book, find the title on your shelf. Tap **Manage Loan**, then **Return**, when asked.

When the return is complete, you'll be asked to go back to your shelf, or search for your next read.
