

Phoenix Library Pollinator Garden and Beehive Implementation
Response to Contractor Questions 2.28.25

Below are the responses to questions that were asked by contractors who attended the mandatory walkthrough on Wednesday, February 26 at 10:00 a.m.

Q: The plans call for trenching of the new irrigation system amongst the trees. The tree protection specifications call for the protection of tree roots. If hand trenching is required, this is an unknown cost that may or may not need to be applied to the bid.

A: See attached bid addendum #1.

Q: Is there a Bid Form included in the ITB? This question was in reference to cost breakdown.

A: A bid form was not included in the ITB. Please use the attached form for your cost estimates and submit it with your proposal.

Q: Where will the staging area for supplies and equipment be located?

A: Contractor to submit a plan to library for approval.

Q: The June 30th, 2025 completion date makes the timeline tight. What if a contractor's timeline extends beyond the June 30th completion date?

A: It is the library's desire to have the project completed by June 30th, but we will not disqualify a bid for a timeline that extends beyond the June 30th completion date.
